CMI Marine offers a complete solution to new cargo hold ventilation hoods.

Ventilation hood model 45 construction is made to accelerating the air, hood dampers is made to close automatically or hand maneuvered. No maintenance due to construction in stainless steel and no greasing due to gasket don't need any grease. This construction makes it possible to have smaller fan motor.

Ventilation hoods model SQ to make the maintenance and service easier, construction stain less steel.

Special designed model SD hoods with fan motor and damper in one package to be mounted onboard.

All hoods will be manufactured and delivered to the ship after customer's requirement. We construct all hoods in stainless steel, painted according to customer preference.

CMI Marine AB has for many years manufactured ventilation hoods for many car ships around the world.

No maintenance due to the material of the hood and **No** lubrication of moving parts.

Our quality on the hoods is very high and made for the marine environment. Over the years, we have not received any complaints about the quality and operational specifications.
