CMI LIFERAFT CRADLE

The Life Raft cradle is approved by Swedish Maritime Administration and Chamber of Commerce and Industry of Sweden. Patent is registered in corporation CMI Marine AB and Wallenius Marine AB.

It is constructed in stainless steel (EU 4301) and tested to launch a life raft in 45 degrees list by one man (life raft 25 KF and 25 K weight 180 kg). This Cradle is unique comparing to previous launch davits and those existing on vessels today, as it make the process of launching the raft much faster and easier. The Life Raft Cradle will not only save time in case of emergency but also manpower in such a situation. This will automatically lead to better safety environment for the crew on the ship.
